Date:

SCBA 04: REGULATOR DON / DOFF **SKILL TO BE ACCOMPLISHED BOTH ON THE USER'S DONNED FACE PIECE AND A SIMULATED DOWNED FIRE FIGHTER**

1. Verify regulator gasket is not damaged
2. Align the two flats of the regulator with the corresponding flats of the face piece
(Red purge valve at 12 o'clock position)
3. Insert regulator into face piece port
4. Rotate regulator counterclockwise (as viewed from inside the face piece) until the red
purge is on the left side of the face piece and lock tab clicks into place
5. To remove, place right hand over regulator cover with thumb on lock tab
6. Simultaneously pull the lock tab towards the cover, depress air saver switch, and
rotate regulator clockwise (as viewed from inside the face piece)
7. When the purge valve is at the 12 o'clock position, remove the regulator from the face
piece.
